

Data Matters

SA is not accumulating IP & data assets

Source: Statistics South Africa. All industries excluding agriculture, hunting, financial intermediation, insurance, pension funding, other business services not elsewhere classified, general government and educational institutions.

Requirements for decision-ready analytics

SA's Data Ecosystem

What do we need to do?

REQUIREMENTS FOR DECISION-READY ANALYTICS

What are we trying to do?

Automated data quality checks

Data Products

Data Platforms & Marketplaces

Protect privacy & security

What does data-driven analytics require?

Forecasting Data Product Example

Data governance baked into databases

Centralisation

Automation

Value Realization

Data Taxonomy

Process codification

Value Chain

Bottom-up implementation

Analytics

Aggregate & disaggregated

Visualisation

Insights

Interoperability

Interaction

Scenario analysis

Answer questions

Judgements

Sharing outputs

Monitoring

Usage

Accuracy

Role-based access

Data Quality

Example: Analytical Value Chain

Data Integration Data Management Data Automation Public data Meta-data Automation of 3rd Party data User-level access dashboards/models Internal data Input data storage Sharing data across AL PARTY OF THE PA Scenario storage organisation Quality assurance **Model Refresh Publication** Data and model update Auto-upload reports / Forecasts and analysis dashboards

Dissemination

Diagnostics

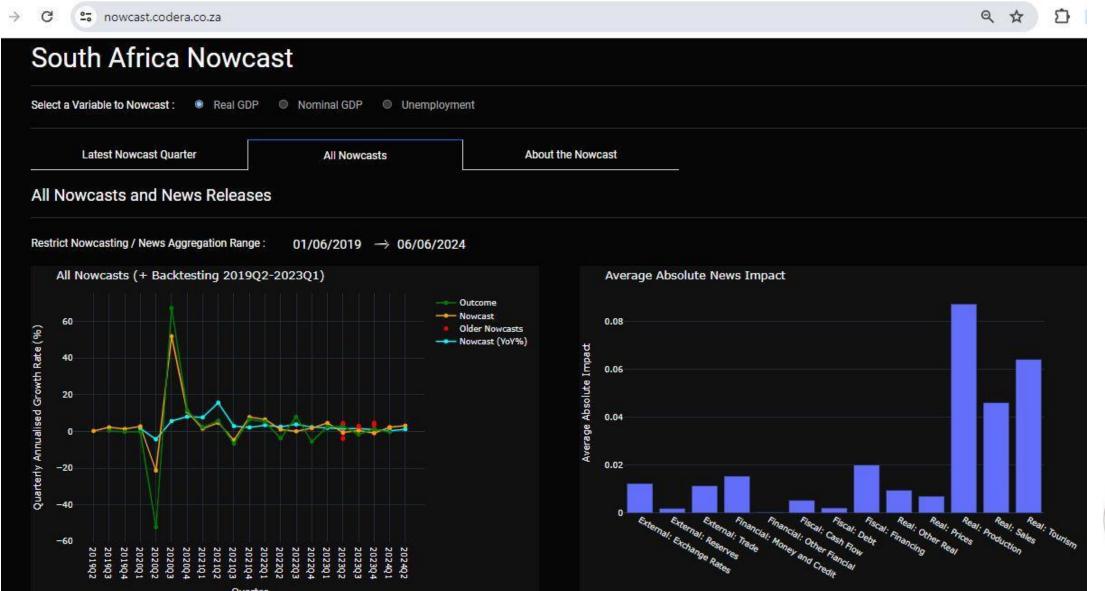

Value added tools

- Historical error assessment
- User defined dashboards
- Judgement addition
- Scenario analysis

Example: Automated predictive analytics

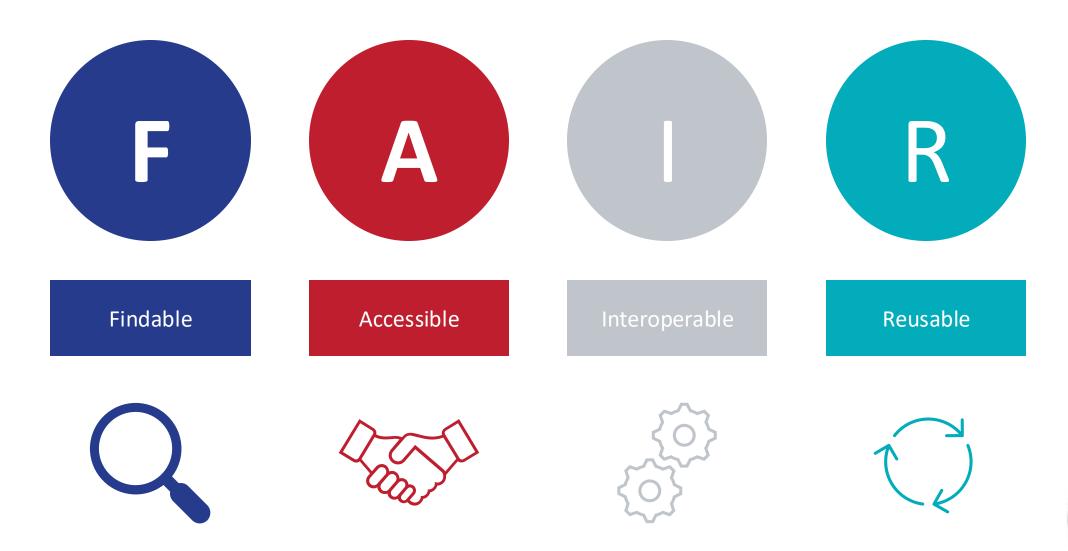

DATA DEMOCRATISATION (PUBLIC & PRIVATE)

FAIR Principles for data governance & sharing

The Data Ecosystem as a city

Roads, Tunnels & Pipelines Data pipelines & utilities **Buildings & Skyscraper** Companies with products & services Residential areas

Housing customer data

Community organisations

- Communities of practice
- Stakeholder fora

CODERA Vehicles

APIs

Trains

Shared platforms & apps

Marketplaces

Exchange, trade & sell

Government

Public services

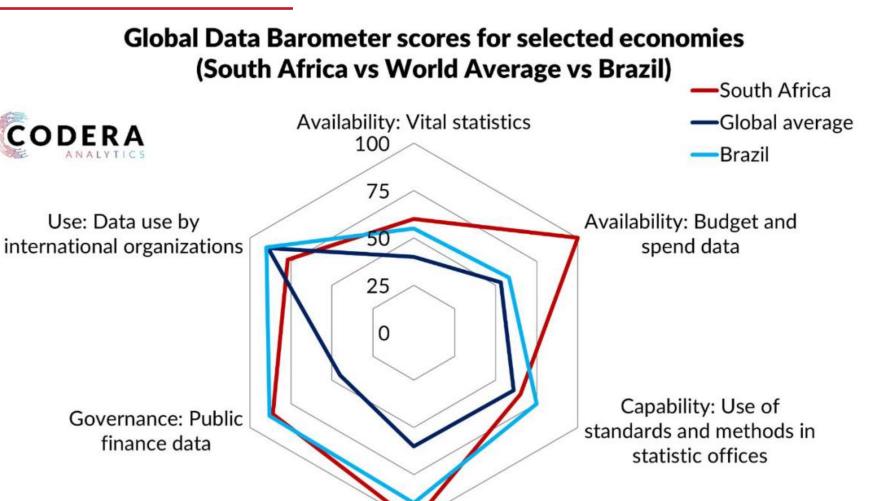

Regulations & standards

DATA **ECOSYSTEM**

SA'S DATA ECOSYSTEM: COMPARATIVE STRENGTHS

SA does well on vital statistics & data protection

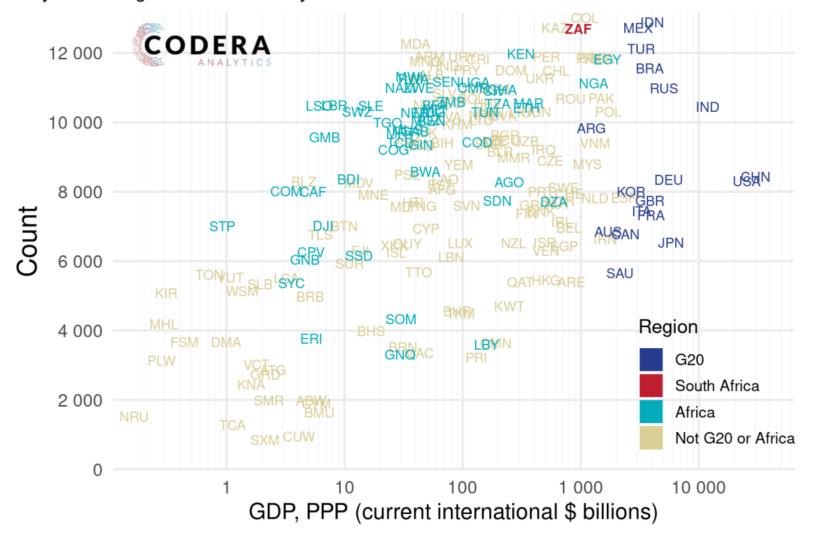

Source: Global Data Barometer (2021).

Governance: Data protection

We stand out on availability

Number of indicators available from the World Bank

City data merged into the country level

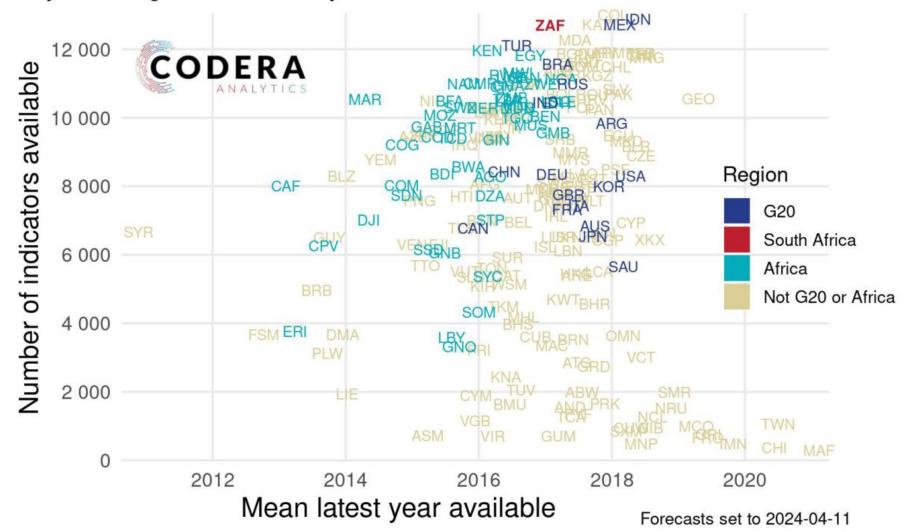

SA'S DATA ECOSYSTEM: COMPARATIVE WEAKNESSES

Though less up-to-date

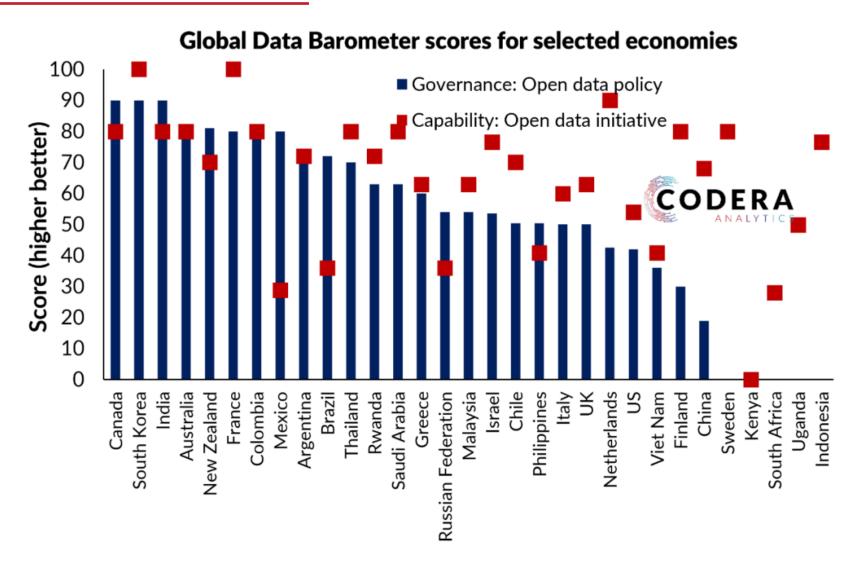

Average latest year available for World Bank indicators, across countries

City data merged into the country level

Weak on open data

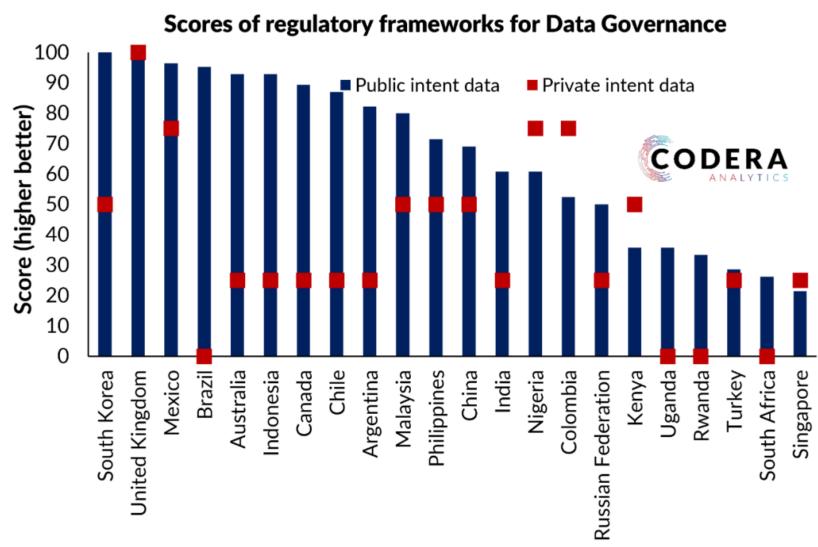

WHY IS SA FALLING BEHIND?

Especially on regulatory frameworks

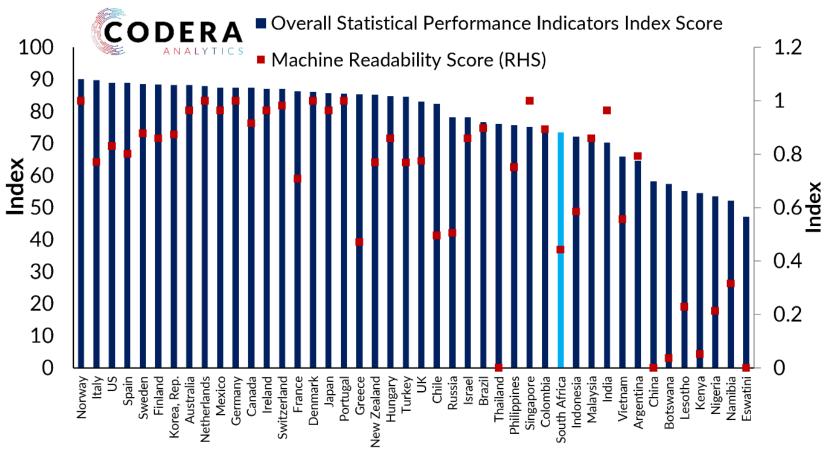

Source: Chen,Rong - DECIG, 2021. "Mapping Data Governance Legal Frameworks Around the World: Findings from the Global Data Regulation Diagnostic," Policy Research Working Paper Series 9615, The World Bank.

... and accessibility

National Statistical Performance Indicators for selected economies

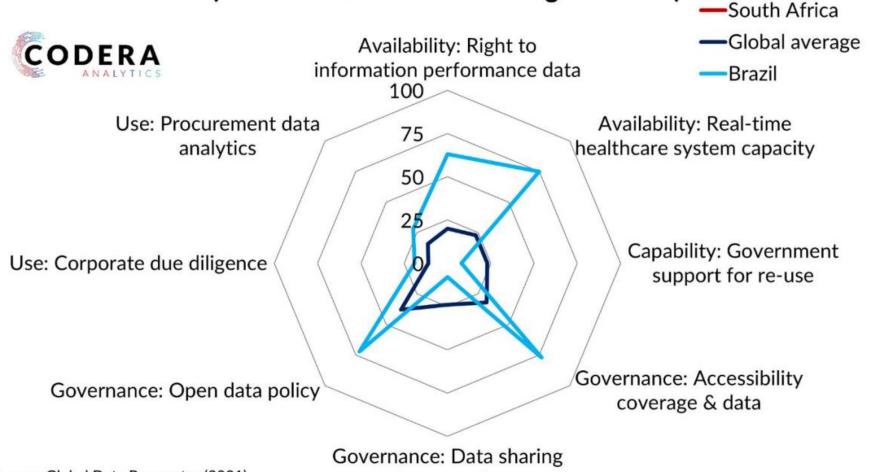

Source: World Bank, estimates for 2019. The Statistical Performance score contains indicators along five dimensions: data use, data services, data products, data sources, and data infrastructure. Each dimension of the five pillars incorporates several indicators.

And frameworks and accessibility

Global Data Barometer scores for selected economies (South Africa vs World Average vs Brazil)

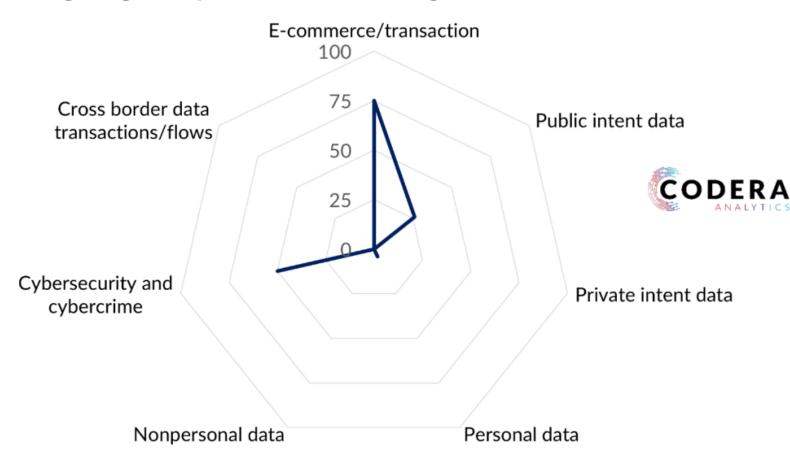

Source: Global Data Barometer (2021).

frameworks

We lack frameworks for data sharing & access

Legal regulatory assessment for data governance in South Africa

Modernising SA's data ecosystem

Centralised coordination body

Architecture for sharing & security

Data Marketplaces

Data Commons

Insight sharing

National Data Strategy

Data **Ecosystem**

Standards & Templates

Data gap stock take

PPPs for data & data products

Public sector 'Open by default'

Stakeholder fora

Data Culture

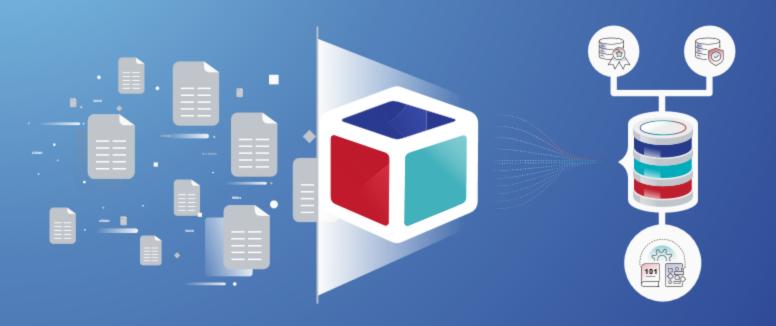

Data democratisation today

Mature your data management today

Make your organisation's data discoverable, accessible and automatically updated

- Integrate external and internal data sources
- Centralize data to be easily discoverable and shareable across teams
- Control role-based access for data sharing and governance
- Ensure interoperability: access via website, Excel, R, or Python
- Maintain an up-to-date glossary of data concepts
- Enable easy data validation
- Implement SDMX for best practice quality management and governance
- Enable workflow automation

Become a super-analyst

- Instant access to up-to-date information from a user-friendly platform, via Excel, website, or API
- Automate models, chart packs, dashboards, and reports
- Utilize forecast and scenario management tools to audit historical forecasts and improve performance over time

Automate your advanced analytics and boost your productivity

Harness your institution's data

- Integrate public domain, third-party and internal data
- Automate dashboards and reports
- Identify trends and synthesize implications
- Enable easy and secure collaboration and sharing across teams

Enable cross-institution interoperability and collaboration

Decision-ready analytics

- Data and model automation within a best practice data and model governance framework
- Automate advanced analytics and scenario forecasting to anticipate how macroeconomic and financial developments affect the outlook for industries and regional economies
- Generate 'what if' scenarios for strategic planning

Leading-edge forecast management and decisionready analytics
